

## Avanti West Coast Stakeholder Update: December 2025 Timetable

From 14 December, we're adding further services to our timetable, including two trains per hour between London Euston and Liverpool Lime Street throughout most of the day, which is nearly double the frequency since the start of franchise, and introducing additional stops at Liverpool South Parkway and Hartford.

The new timetable builds on our previous uplifts in May and September this year which saw the number of services we're operating on the West Coast Main Line increase to its highest ever level, following the introduction of our £350m Evero fleet.

From 14 December, the total number of services we operate will increase further to 2,078 per week. There will be some changes to the base timetable from 27 December to 14 January due to Network Rail carrying out major upgrade work on our route.

We are disappointed with the Office of Rail and Road's decision not to grant access rights from December for four weekday services that we currently operate, as well as requiring a Sunday service which currently runs from Holyhead to London to terminate at Crewe. This will impact those customers who already use these services.

However, we will still be delivering even more services across our network from the start of the December timetable, including the further additional trains on our Liverpool route.

### Number of trains operated

Weekdays 313; Saturdays 290; Sundays 223
